

ABDULMAJEED TAYYAR

Full-Stack & AI Engineer

SKILLS

Python, JavaScript, SQL
React / Next.js
HTML, CSS, REST APIs

AI & AUTOMATION

RAG & LangChain
AI Agents
n8n Workflows

TOOLS

Git, Railway
Vercel, Supabase
Claude Code

LANGUAGES

English (Fluent)
Arabic (Native)

LEADERSHIP

VP, STEM Club (2 yrs)
VP, Student Council (1 yr)

ABOUT ME

Full-stack and AI engineer shipping production systems end to end: an enterprise RAG platform at **Trend Micro**, client work for **Al-Futtaim** and Saudi Arabia's **Ministry of Education**, and a **NASA Space Apps** project. Strongest in Python, JavaScript, and applied AI.

EXPERIENCE

AI & Full Stack Development Intern

June 2026 – Present

Trend Micro

- **TrendVision1:** independently designed and shipped a full-stack cybersecurity training platform, owning frontend, backend, database, and AI architecture.
- **AI Assistant:** RAG system (LangChain, OpenAI embeddings) grounded in internal documentation, fed by a Docling / MarkItDown ingestion pipeline.
- **Learning Engine:** dynamic assessments, progress tracking, and voice-enabled lessons.
- **Production:** live on Vercel, Railway, and Supabase; sole owner of releases, monitoring, and iteration.

Freelance Full Stack & AI Developer

2025 – Present

Independent

- **Al-Futtaim (Marks & Spencer):** delivered a corporate staff-training platform with quizzes and automatic certificate generation.
- **Ministry of Education:** built Suluk, an anti-corruption learning platform with dynamic exams teaching students to recognize and reject corruption, via Al Faris International School.
- **AI MVPs & Automation:** scoped and shipped AI products and automation systems for startup clients, from requirements to production.

PROJECTS

CosmicAI · NASA Space Apps Hackathon

- Engineered an ML platform that analyzes telescope light-curve data to flag exoplanet candidates, with interactive visualizations of model predictions.

AI Lawyer Assistant

- Developed a legal operations dashboard covering case management plus contract generation and analysis, driven by a conversational AI interface.

Doctor AI · Medora MVP

- Created an AI medical scribe: transcribes doctor-patient conversations with the Whisper API and drafts visit summaries and prescriptions.
- **AI Coder (Calculator ESS):** translates engineering equations directly into ESS-compatible code.
- **Email Marketing & Review Automation:** n8n pipeline automating review collection, keyword scraping, and Supabase discount codes.

EDUCATION

Al Faris International School

High School Diploma · GPA: 4.0 / 4.0

Graduated 2026
